17 NOV 1983

MEMORANDUM FOR: Executive Assistant to the Executive Director  
VIA: Executive Officer to the DDA  
FROM: [redacted] Acting Director of Security  
SUBJECT: EXCOM Agenda Items - 18 November 1983 Meeting  
REFERENCE: EXCOM 83-015, dated 9 November 1983

1. The Office of Security has reviewed the Directorate of Intelligence External Analysis Study. In essence, we agree with its findings and recommendations. We would caution, however, that as the amount of work contracted out increases, careful attention must be paid to providing the security personnel and dollar resources necessary to protect the Agency's industrial security equities. [redacted]

2. We also concur with the findings of the Emplaced Sensor Study. We note that the Study addresses positive operational activity rather than the audio countermeasures activity in which the Office of Security is engaged. [redacted]
